

# WE'RE MAKING LAKE SPRING PARK BETTER FOR YOU

When Lake Spring's ducks are eating the wrong thing, our park becomes overrun with animal feces. This is not healthy for our visitors, especially young children. It's definitely not healthy for the ducks to eat food like French Fries, bread, popcorn or corn feed.

We are feeding the ducks wildlife-friendly food on a daily basis. You also can do your part to make Lake Spring healthier. If you would like to feed the ducks some snacks, please use food that will be available in dispensing machines located in the park as soon as it reopens.

Lake Spring Park is undergoing an extensive renovation this winter. Besides adding 900 feet of new decorative fence to the park, a new landing area for the water fowl has been established in the back of the park and new feeders and shelters are being installed in that area. In addition, a brand new pump system designed to enhance the flow of fresh water from one pond to the other will be in place when the park reopens April 26. Thank you for your patience during this process.
